

Learning Is Fun (and a bit stinky)

Ronald Dragon, An Electronic Storybook is a versatile product for teaching a number of skills to ages 3–7, and ESL to ages 7 to adult.

What Is It?

Ronald Dragon, An Electronic Storybook is an interactive story on CD-ROM for Windows and Macintosh computers. Animation, music, sound effects and the fun story hold students' interest. Words are highlighted just before they are spoken, to draw students' attention and make the connection between print and sound.

Beyond the story, there is an exploration mode through the story's world, and a "Meet the Characters" section where students, parents and teachers learn about the inhabitants of this fun world.

Why Is It Stinky?

Relax, it's not really stinky—but some of the characters are. Stinkiness is used to represent issues and present problems to be solved. Plus, it makes the story fun and funny for children and adults alike.

What's the Message?

The lessons in the story are about tolerance and diversity ("beauty is in the nose of the beholder"), and turning enemies into friends (instead of into lunch). These can be expanded upon to deal with prejudice, perceptual differences, conflict resolution, compromise and more. The story also has a strong pro-recycling message.

What Do I Need to Run It?

Ronald Dragon, An Electronic Storybook will run on any color Macintosh and any Windows computer (even old ones running Windows 3.1) with a CD-ROM drive and speakers.

"Ronald Dragon is absolutely wonderful! A great story that entertains children of all ages with fabulous illustrations and a funny story line. And it encourages children to read the story as it unfolds. In fact, it makes children anxious to read the next line on their own because the story is so engaging. Ronald Dragon is a great addition to any school or family computer."

—Dr. Kathe Kain

"My fourth-grade ESL students love Ronald Dragon! It makes learning vocabulary fun."
